Cool computer cases

I was over at Brent's today, checking out his new computer. He got his case over at MysteryByte Computers, that place that you can see from the Armdale rotary, but can't figure out how to get to (I guess that's the mystery). I was just wondering if any of you other cats have interesting or novel cases on your computers besides the standard, drab beige.

My case is pretty cool (although still beige). It has a lockable front to prevent access to drives as well as 4 castors that I can roll it around on. It's also sturdy enough to ride around on.
