

Crappy hardware free-for-all

I am giving away a bunch of old hardware that is not necessarily crappy, as the title of this article implies, but is stuff that I just don't need or use anymore. This is including, but not limited to, two pairs of computer speakers, two monitors (a 15", and a 14") and numerous cases. Make me an offer on a K6-2 350 Mhz computer as well (sans ram and hard drive)....no, I'm not giving that computer away.

Feel free to drop by and pick stuff up. If you really want something, post here and I'll hold it until you can come and get it. First come, first served.

If you need directions to my place, [drop me a line](#).
