

# My new toy

I love getting new pieces of electronics. It's like Christmas; the sweet smell of virgin circuit boards filling your nostrils. Last week, I went and bought myself a Palm Zire 72 as an upgrade from my Zire 71. Coincidentally, I'm also looking to sell my Zire 71. Let me know if you're interested ;)

The Zire 72 improves on the Zire 71 in just about every conceivable way: It has more memory (16 -> 32 Mb), faster processor (144 Mhz OMAP -> 312 MHz XScale), better camera (now 1.2 MegaPixels), and best of all Bluetooth wireless capabilities.
