My own personal feed, burned

Just now, I went and hooked myself up with a feedburner feed for my personal blog here on Spine.cx. What's really cool is that I found out that I can have all the links that I post with del.icio.us, and all the photos I post on Flickr spliced into the feed with no extra effort from me. I'm all about being lazy. I think it will also automatically change any MP3 I link to into a podcast enclosure as well, if you're into that sort of thing.

So, if you want the one-stop-shop for all things Steve, check it out:
