

Prequel to "Silence of the Lambs" being remade

I read over at SandyWalsh.com that they're redoing the movie known as [Manhunter](#), only this time it's going to be called "[Red Dragon](#)" and [Edward Norton](#) gets to be the star.

For those of you have never seen Manhunter, it's a prequel to [Silence of the Lambs](#) and (in my opinion) can't hold a candle to its successor(s). It's quite weird seeing somebody play Hannibal Lecter who's not [Sir Anthony Hopkins](#).

Here's a link to the [original story](#).
