Selling vintage computers on Ebay

I am selling some *vintage computers* on Ebay right now. If you're in the market for some museum pieces or just looking for a better doorstop, go on and take a look at my auctions. If you're in Halifax, I'll deliver them to you for free.

Just think, **YOU** could own the machine that launched my career as a software developer, the Commodore Vic 20. At the tender age of 5, I wrote my first line of BASIC on that very keyboard. Or you could proudly display your very own MacQuarium made from the MacIntosh Plus. The possibilities are *endless*.
